YOU ARE IN COMPLETE  
CONTROL

A man and a woman are sitting on a light-colored sofa in a modern living room. The man is holding a glass of red wine and pointing towards the camera. The woman is also holding a glass of red wine and looking towards the camera. In the background, there is a kitchen area with shelves and a small screen on the wall.

# OUR PROCESS

NO PROJECT IS TOO BIG OR  
SMALL FOR US

## FOCUSSED ON RESIDENTIAL

### DISCOVERY & DESIGN

Our Philosophy at FlinkTech is, if you fail to plan you plan to fail. This first phase of any project is the most crucial and will lay the groundwork for our clients' overall satisfaction. At this stage we require our clients' to spend time with our design staff to provide their input on their desires and needs for their system.

### EXECUTION

At this phase the hands on work begins from the initial system prewire to the installation of the equipment. This phase is driven by the design and engineering accomplished with our clients' needs to ensure a continuous workflow and cohesive systems implementation.

### DELIVERY AND SUPPORT

We understand that the most important part of customer satisfaction is the ease of use and understanding of how the system is to be operated. Our staff will spend the necessary time to answer all your questions and train you for understanding the system. At this stage we will assure your satisfaction and hand over you the keys to your new system.

WE HANDPICK THE BRANDS AND PRODUCTS FOR YOU. WE DO NOT WANT TO, JUST SELL, BUT MAKE LONG-TERM RELATIONSHIPS WITH QUALITY PRODUCTS.

Crestron, doesn't just build products; they build automation and control solutions for buildings and homes. All of their products are designed, built, and guaranteed to work together as a complete system, rather than a collection of unrelated parts housed in technology silos. They provide greater comfort, convenience, and security.

Crestron builds the technology that integrates all of the disparate systems and devices in buildings and homes on a single open platform so they can communicate and work together intelligently. We provide solutions that enable you to monitor, manage, and control everything from one platform, anywhere, anytime, using touch screens, remotes, and smart devices.

Their solutions have been shaped by more than four decades of innovation. they've evolved across many industries, gaining strength and expertise through their diversity. Their focus on meeting the needs of the clients' is evident in their enduring presence in Automation markets.

A photograph of a modern Crestron building with large glass windows and a flat roof. The word 'CRESTRON' is visible on the upper part of the building. In the foreground, there is a well-maintained lawn and a flower bed with yellow and red flowers. The sky is clear and blue.

# QUALITY EQUIPMENT

# FEATURES

## CRESTRON HOME AUTOMATION WITH FLINKTECH

### INTEROPERABILITY

Ability to tie diverse electronic devices together so they can perform as one unified system.

### REMOTE ACCESS

Capability to alter the settings of the lights, thermostats and other gear remotely without being at home.

### EXPANDABILITY

Can be easily expanded vertically to incorporate additional products and horizontally to support additional rooms.

### UPGRADEABILITY

Software is the driving force of an automation system. We make sure that your home automation system is always updated with the latest.

### VARIETY OF USER INTERFACES

Wall mounted Key Pads, Touch Screens, Remote Controller, Smart Phones (IOS & Android), Smart Tablets (IOS & Android).

### TIME TESTED

Over 45+ years of existence of Crestron in the market and still growing needs no introduction.

### STRONG PRESENCE

With Crestron being present in NZ with its own company office, requires no other peace of mind.

### ENERGY CONSERVATION

Save energy by turning off electronic devices automatically.
